

Dependent and Independent Variable

x, independent variable
(input values or domain set)

y, dependent variable
(output values or range set)

Example:

$$y = 2x + 7$$

Dependent and Independent Variable (Application)

Determine the **distance** a car will travel going 55 mph.

$$d = 55h$$

independent

<i>h</i>	<i>d</i>
0	0
1	55
2	110
3	165

dependent
